

polycondensate comprising at least one sequence chosen from polyurethanes and polyureas; and  
an organic solvent, wherein the weight ratio of the propellant to the organic solvent is  
greater than or equal to 1.5:1; and

(ii) the device is suitable for giving an initial flow rate of aerosol composition of  
less than or equal to 0.75 gram per second,

wherein said at least one polycondensate is formed by an arrangement of blocks, this  
arrangement being obtained from:

- Accont*
- (1) at least one compound which contains at least two active hydrogen atoms per  
molecule;
  - (2) at least one diol containing at least one functional group chosen from acid radicals  
and salts thereof; and
  - (3) at least one isocyanate chosen from di- and polyisocyanates.

### REMARKS

By this Amendment, claim 1 has been amended. Support for the amendment comes from  
the specification, as originally filed, at page 4, for example. No new matter has been added.  
Currently, claim 1 is pending in this application.

Early and favorable examination is respectfully requested. If the Examiner believes  
anything further is necessary to expedite examination and allowance of this application,  
Applicants invite the Examiner to contact their undersigned representative at the telephone
